REPORT FROM CITY HALL

ART RECEPTION

## who's hangin' at the library

**The City of San Bruno's  
Culture & Arts Commission  
Invites you to our inaugural event**

### & when

**Sunday, November 14, 2004  
From 3:00 – 5:00 p.m.**

**At the San Bruno Public Library  
701 Angus Avenue West**

honoring renowned  
local artist **William  
Hubacek** (1866-1958)  
whose works are on  
permanent display  
at the San Bruno  
Library & featuring  
the work of artists  
from **Capuchino  
High School,  
Skyline College,  
and the San Bruno  
Senior Center.**

For more information  
please call Culture &  
Arts Commission

# Pocket Bikes: Are they legal?

**T**here has been a recent increase in the use of “pocket bikes” and mini-bikes on City streets, and there is some confusion as to whether they are legal.

A “pocket bike” is basically a miniature motorcycle. They often resemble sport bikes or other race bikes and are generally equipped with gasoline-powered engines that are 50cc’s or less, but may be in a “cruiser” or other configuration and may also be electric/battery operated. According to the California Vehicle Code, section 405, any motorcycle that displaces less than 150cc’s is, by definition, a motor-driven cycle, regardless of whether it is gas or electric powered. These “pocket bikes” are very fast, 30-40 mph, and can be very dangerous if operated irresponsibly or by an inexperienced rider.

The San Bruno Police Department’s policy is to treat “Pocket Bikes” or mini-bikes as “Motor-Driven Cycles,” as defined in 405 C.V.C., which is consistent with the California Highway Patrol and other police agencies. Unless properly equipped, “Pocket Bikes” are **NOT street legal!!** Officers will be issuing citations to anyone not complying with state or local laws and regulations.

The San Bruno Police Department and other surrounding cities have received a flood of complaints on these “Pocket Bikes” for speeding, excessive noise, and traffic accidents. We are very concerned that individuals are not fully informed on the safety issues of these “Pocket Bikes” and the laws relating to their use on our public roadways. Before purchasing one of these “Pocket Bikes,” please take a moment to review some of the important laws listed below:

1. A valid California driver’s license is required, with a motorcycle endorsement.
2. Riders must wear a helmet.
3. “Pocket Bikes” must be fully equipped; all lights, brake lights, brakes, turn signals, mirrors, horn, muffler, registration, etc.

4. “Pocket Bikes” do not have VIN’s, and therefore cannot be registered or ridden on the roadways or sidewalks.

5. “Pocket Bikes” are subject to ALL of the rules of the road!

If applicable, riders of “Pocket Bikes” on public roadways can be cited per section 24002(b) of the

California Vehicle Code, “Unsafe Vehicle.” Additionally, unlicensed riders may have their “Pocket Bikes” towed/impounded for up to 30 days.

If you have any questions regarding “pocket bikes,” please call Traffic Sgt. Craig McKee-Parks or Traffic Officer Mark Howard at (650) 616-7100.

**Officer Jason Pasero demonstrating the size of a Pocket Bike.**

## Work furlough closes City Departments

**B**ecause of the City’s budget problem, City employees have agreed to take a 3-day unpaid furlough in December. City business offices will generally be closed and services curtailed from Monday, December 20, through Wednesday, December 22. The furlough period was scheduled during the holiday period to cause the least inconvenience to the public.

Emergency services—Police and Fire operations—will not be affected. In addition, San Bruno Cable Television personnel will be at work during the furlough to handle customer service calls. Essential work by both Parks and Public Works will continue during the 3-day period. Other operations, including the

Library, Recreation Services, and City Hall, will be suspended during this period.

City employees agreed to the 3-day furlough for needed budget savings in the 2004-05 fiscal year. Employees working during the furlough in essential or emergency capacities will take off 3-days without pay at another time during the year. Employees affected by the furlough will realize a 1.5% pay cut in 2004-05.

As part of the implementation plan, signs and other notices will advise all residents of City facility closures and service changes. Every effort will be taken to minimize disruptions.

# City Council cuts City budget for 2004-05

**T**he San Bruno City Council recently adopted a \$26,535,100 General Fund and Special Revenue Funds Budget for 2004-05. The City's usual two-year budget was compressed, and the Budget covers only one year given the economic uncertainty facing the City—and all cities and counties as well as the State of California itself.

The Budget addresses the most difficult fiscal challenge the City has confronted in years. Major revenues continued to decline (at best showing no growth for a third year), the State aggressively seized additional City revenues, and unprecedented one-year increases in insurance and employee retirement costs combined to negatively hit in 2004-05.

To balance the 2004-05 Budget, the City spent several months developing a comprehensive Budget Strategy. The adopted Budget Strategy included: 1) reducing administrative and support functions), 2) restructuring employee compensation, 3) reducing expenditures for all public services, including Police and Fire, and 4) enhancing limited revenue sources.

City employees are experiencing substantial impacts from the 2004-05 Budget Strategies. The total City workforce has been reduced from 266 positions to a total of 241—employees were laid-off for the first time in the City's history. Salaries will not be increased, and employees are paying a greater share of the retirement costs. Also, each City worker continues paying about one-third of the health care benefit premium. A majority of City employees will actually experience a further reduction—with the implementation of a non-paid, three-day work furlough (see related article on page 2).

The community has also felt the effect of service reductions implemented in the 2004-05 Budget. Necessary expenditure reductions for 2004-05 resulted in:

- Library closed on Sundays.
- Fire Department cross-staffing, in which one fire apparatus periodically remains out of service for a set time.

- Cutbacks in building and facilities maintenance.
- Reduced Human Resources administration.
- Reduced level of park maintenance.
- City Clerk counter public service restricted.
- Delays in Community Development public counter service and application processing.
- Curtailed Police administration and support services.
- Cutbacks in Finance and internal administration.

In avoiding a total projected budget deficit of \$3,000,000, the 2004-05 Budget also anticipates limited revenue enhancements impacting the community. A 911-Emergency Dispatch User Fee will be paid by residents maintaining access to the 911-system through local telephone service, both hard-wire and wireless lines (up to now, Police and Fire, with

combined budgets amounting to \$14,000,000, brought in only about 6% of the budgets in fees). In-lieu Water and Wastewater Enterprise Fund franchise fees (2%) and enterprise rental charges will discontinue the practice of general taxpayer subsidy of these business-like operations.

Overall, the City Council's strong commitment and direction to address a potential deficit in a timely and effective manner has produced the necessary results. The City's General and Special Revenue Funds remain reasonably healthy, principally due to sound fiscal practices, selected revenue enhancements, and adherence to a lean organizational staffing structure.

The adopted General Fund and Special Revenue Funds Budget for 2004-05 is available for public review in the City Clerk's Office and at the Public Library. If you have any questions regarding the budgets, or City finances, please call Jim O'Leary, Finance Director, at 650-616-7023.

## November Ballot Initiative 1A prevents State from taking local funds

**P**roposition 1A is an initiative that will be on the November ballot that will prevent the State Legislature from taking and using funds originally committed to local governments.

Prop. 1A also requires the State to reimburse local governments for the cost of programs and services it mandates cities, counties and special districts provide. If the State fails to provide reimbursement to local governments for state mandated local programs, the mandate must be suspended, except for specified employee rights and benefits.

Prop. 1A allows for flexibility in the event of a future state fiscal emergency. The State may borrow local government funds, only if the Governor declares a fiscal necessity and 2/3 of the legislature approve. All funds must be repaid within 3 years.

For more than a decade, the State Legislature has been shifting billions of local property tax dollars each year from cities, counties and special districts in order to fund the State's obligation to schools. Commonly referred to as ERAF (Educational Revenue Augmentation Fund), the State has shifted more than \$40 billion in property taxes since the early 1990's from local services, including \$7,500,000 from the City of San Bruno. The amount being diverted from local budgets keeps growing and now amounts to nearly \$5 billion annually — \$1,475,000 from the City of San Bruno.

The State has also imposed billions in additional costs on local governments by mandating programs and services that are only partially funded or not funded at all by the State.

# Community Development at

**S**an Bruno is realizing the benefits of its coordinated efforts on strategic planning and economic development. Two major projects, The Crossing Development and The Shops at Tanforan Renovation, are in progress and will dramatically impact the City's future. In addition, the Redevelopment Agency-sponsored Building Façade Improvement Program is starting to provide results.

## **The Meridian Apartments at The Crossing - 300 New Apartments** 1099 Admiralty Court

The Meridian Apartments is an exciting new residential community in the heart of San Bruno, close to shopping, dining, transportation, and employment, which is scheduled to begin leasing in October 2004. The Meridian is the first phase of The Crossing / San Bruno, a 20-acre mixed-use development on the former U.S. Navy site across the street from The Shops at Tanforan on the west side of El Camino Real. An on-site leasing office is scheduled to open in mid-September.

The 5-story, 300-unit Meridian will include 240 market-rate units and 60 below-market-rate (BMR) units reserved for families with incomes up to 50% of the county median income adjusted for family size. The San Bruno Redevelopment Agency will subsidize the rents of BMR units. The Redevelopment Agency is scheduled to approve the owner's marketing and leasing plan for the BMR units on September 15, 2004. Major aspects of this apartment development include the following:

- A total of 300 units, with approximately 146 two-bedroom units and 154 one-bedroom units, with two internal courtyards.
- One-bedroom unit size range from 570 square feet to 957 square feet, and two-bedroom unit size range from 1,056 square feet to 1,247 square feet.

- Market rate rents will range from \$1,550 to \$1,900 per month for a one-bedroom unit to \$2,350 per month for a two-bedroom unit.
- Initial rents for the 31 one-bedroom and 29 two-bedroom BMR units will range from \$948 per month for a one-bedroom unit, to \$1,134 per month for a two-bedroom unit.
- Parking will be located in an internal 6-story parking garage providing convenient access to units on each floor, and concealing the parking garage from external view.
- A new private recreational center and indoor swimming pool adjacent to the apartment complex will also serve this and future phases of the development.
- Future phases of The Crossing will include a 185-unit apartment building (now seeking approvals), senior housing, condominiums or office space, a major hotel, and up to 20,000 square feet of retail space.

The Crossing will have entrances on El Camino Real and Sneath Lane. The new signaled intersection on Sneath Lane providing access to National Avenue has been completed. A new four-way intersection on El Camino Real providing entrances to both The Crossing (onto Commodore Drive) and The Shops at Tanforan will be constructed in the spring 2005.

Information is available at (866) 886-3743, or check the project Web site at the following address:  
<http://www.meridianatthecrossing.com/>.

## **Update on the "The Shops at Tanforan" Remodel and Expansion**

Formerly known as Tanforan Park Shopping Center, this long-awaited overhaul of the shopping mall will completely rejuvenate the Center, turning it into a regional retail and entertainment complex. Major aspects of the redevelopment project are scheduled for completion in October 2005, and include the following:

- Continued "Open for Business as

# nd Redevelopment activities

Usual” for the three major anchor stores: Sears, Penney’s, and Target.

- Closing of the center section of the mall to allow a total remodel of the retail area, including additional corridors with national retail outlets, seismic retrofitting to meet earthquake standards, and a complete upgrade of materials and finishes to create an entire new look for the Center.
- A new food court area on the east side of the Center, as well as other new restaurants within the mall.
- A new parking garage at the north-east corner of Sears, with a stadium-style cinema complex on top with 20 screens and a total capacity of approximately 4,200 seats.
- A dramatic expanded front entry on the west side of the mall, with a major bookstore, restaurant, and open plaza to greet customers. The architectural details of the expansion were approved by the Architectural Review Committee in July 2004.
- A new four-way intersection with traffic signal on El Camino Real to allow customers full access (right and left-hand turns) into and out of the shopping mall.

The developer has already leased out a majority of the commercial space inside the mall. Please continue to shop at Sears, Penney’s, and Target while the rest of the Center is under construction, and look for a grand opening of The Shops at Tanforan in October 2005.

## Building Façade Improvement Program Update

The Redevelopment Agency’s Building Façade Improvement Program has generated a great deal of interest amongst property owners and business owners in downtown San Bruno and along El Camino Real in its first year of operation. The façade program provides matching grants as an incentive to upgrade storefronts in the Redevelopment Area and create stronger and more attractive shopping areas.

Agency grants leverage private investment to replace deteriorating and obsolete storefronts, including such improvements as modernizing entryways and display windows, making ADA accessibility upgrades, providing signage, and utilizing quality materials. Grant amounts range from a minimum of \$1,500 to a maximum of \$20,000.

Two projects have been completed in 2004, and a third is nearing completion.

- 609 - 617 San Mateo Avenue, **Panaderia Eduardo’s**. The new owner of this building has invested over \$100,000 to restore and bring new life to this mission-style building, which was constructed in 1909, and open a new Mexican bakery. With the help of the Agency’s façade grant, the owner was able to faithfully restore the façade to its original appearance.
- 719 Camino Plaza, **Russian Family Bakery**. The business owner has invested over \$100,000 to double the size of their bakery, by expanding into the vacant adjacent space and creating a dining area. The façade program grant helped the business owner to create a uniform single storefront for the two spaces.
- 599 San Mateo Avenue, **Valencia Market**. The business owner took advantage of the façade program grant to remodel an obsolete and inefficient double entryway with a new storefront, doorway, and display windows.
- Three façade projects have been approved and are scheduled to begin construction this fall and winter.
- Staff is currently working with six potential business and property owners who have expressed strong interest in the program.

Program information and application forms are available at the Community Development Department or on the Redevelopment Division Web page accessed through [www.sanbruno.ca.gov](http://www.sanbruno.ca.gov).

# El Camino Real roadway improvements project update

**T**he City is approaching the advertisement date for bids for what is estimated to be an \$8.0 million roadway improvement project on El Camino Real from Sneath Lane to Interstate 380. The project will include roadway widening, signal improvements and additional turn lanes at El Camino Real and Sneath Lane, and a new mid-block signalized intersection between Sneath Lane and the I-380 interchange. These improvements are designed to improve traffic circulation and mitigate traffic impacts from surrounding new development, including the redevelopment of the Tanforan Mall (now The Shops at Tanforan), and The Crossing, a mixed-use development under construction at the former Navy Facilities West property

across from Tanforan.

The project schedule calls for initial construction activities to commence in January 2005. In the interim, the City is finalizing the acquisition of the right-of-way parcels required for the roadway widening and obtaining necessary design approvals and construction agreements from the State Department of Transportation (Caltrans), which is responsible for El Camino Real since it is a state highway (SR 82). Substantial completion of the roadway improvements is anticipated in October 2005, ahead of the anticipated grand reopening of

The Shops at Tanforan and the 2005 holiday shopping season.

Funding for the street work will come from a variety of sources, including developer contributions, BART mitigation measures, Federal transportation funds, and City gas tax and Measure A funds.

## City of San Bruno New Business Licenses for 4/01/04 through 6/30/04

These businesses have opened in San Bruno or had a change in ownership. We encourage you to visit these new businesses and shop locally, as a portion of the sales tax paid is returned to the City and used to provide City services.

## San Bruno Cable TV: staying on top of the cable industry

**S**an Bruno Municipal Cable TV is a member of the National Cable Television Cooperative, Inc. (NCTC). Along with other independent cable operators, San Bruno Cable TV joined this organization to obtain better rates for programming and hardware. Programming rates and hardware are sold as volume-based commodities, where the more you purchase, the lower the rates. NCTC provides the vehicle by which San Bruno Cable Television can purchase programming and hardware at a reduced rate per subscriber. By obtaining lower programming and hardware rates, these savings are passed on to San Bruno Cable TV subscribers.

In addition, SBCATV management staff attends meetings of the NCTC, which provides an opportunity for members to attend and learn about cable industry trends, new products or services, and to exchange ideas. Their annual convention is held for independent operators and focuses on the future of small to mid-sized companies with an emphasis on managing small cable franchises ahead of the competition. Attendance at these meetings helps SB Municipal Cable to stay on top of new technology and trends in the cable industry.

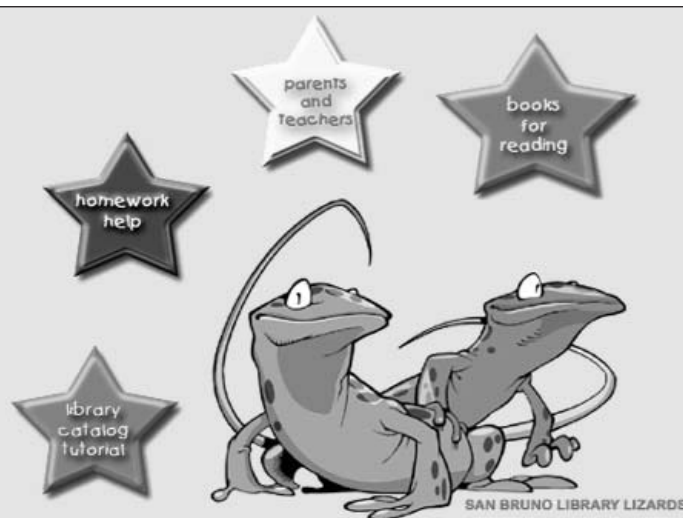

At the most recent NCTC National Convention, representatives from Washington D.C. were on hand to discuss issues facing cable operators, including programming rates, subscriber rates, competition, indecency, and digital television.

"Retransmission Consent" for local broadcasters continues to dominate the issue that cable operators are wrestling with. As more broadcast networks own multiple program services, cable operators are being asked to carry those services or pay fees in order to carry their local broadcast networks. These negotiations are necessary for cable operators, but not for satellite providers as they aren't required to offer local broadcast channels. The NCTC is in our cor-

ner addressing these concerns to the representatives for fair competition and to evaluate programmer fees imposed on cable providers.

The NCTC members meeting gave an insight into the growth of the industry and the advancement of technologies in broadband telephone service (VoIP), Video on Demand (VOD), High Definition Television (HD), Digital Services, and High Speed Internet. These services are more reliable than ever before and offer the subscriber more service choices. San Bruno Municipal Cable TV offers most of these services now and is exploring the possibility of offering VoIP or VOD services as we examine those business models. Cable operators are promoting digital service as the mechanism to deploy new services. Digital subscribers today with San Bruno Cable TV may choose Sports, Spanish, High

Definition, or Movie packages. International Channels and Music Channels are also offered on the Digital Tier. Fifty Premium Movie channels and over 30 additional basic channels are available with Digital Service. The Digital platform is the latest technology enabling cable operators to carry more channels and services. High Definition programming requiring HDTV sets has spawned the market of Home Theatre Systems. Customers with Digital Services, including HDTV, enjoy the latest technology with sharp, detailed pictures from their cable service. High-Speed Internet such as the type San Bruno Cable offers today continues to be on the forefront of broadband technology. As evidence of this achievement, San Bruno Municipal Cable Television is pleased to announce signing up its 3,000th customer of Internet service.

QUESTIONS?

CALL 616-7078 AND CONNECT WITH THE CHILDREN'S ROOM.

# Focus on ... your questions

**Q:** I live in the hills, and water from a natural spring is causing water damage to my property. What can the City do about this problem?

**A:** Springs are a naturally occurring phenomenon in many of the hilly areas of San Bruno. Their locations vary, depending on perched underground water tables, how wet or dry the year has been, and underground geologic soil conditions. The City has no way to determine when or where a spring will discharge, and remedying the condition is not a service provided by the City. If you are experiencing problems due to a spring, talk to a qualified engineer or contractor about improvements that can be made on your property to collect the water and channel it to the City street; from there, the City storm drain system will collect the water and transport it away from homes and businesses. Your contractor should talk to the City's Engineering Division and obtain advance approval of any planned work in the street right-of-way, such as removing a portion of the curb, gutter, and sidewalk to install a drainage pipe.

**Q:** I just bought a home in San Bruno, and I am going to be doing a lot of improvements. What type of work requires a building permit?

**A:** If you are intending to do any remodel work or replacement of items, most all work requires a building permit. The most common work requiring permits include: foundation replacement or repairs; replacing water and sewer lines; dry rot or termite repairs; bathroom and kitchen remodels; window and sliding glass door replacement; exterior door replacement; interior alterations; re-roof; replacement/repairs to siding or stucco; electrical repairs, alterations, or service upgrades; hot tub or swimming pool installation; water heater replacement; furnace replacement.

**Q:** I was told that some type of home improvement construction does not require a building permit. Is that true?

**A:** There are a few items that are exempt from needing building permits. These include: one-story detached storage or tool sheds less than 120 square feet; fences not over 6 feet high; retaining walls not over 3 feet high; walkways or decks not over 30 inches above the grade; residential window awnings projecting not more than 54 inches away from the building.

**Q:** I am a business owner and want to install a new sign. Do I need a sign permit?

**A:** Any time there is a new sign that will be installed, even if it is in the same location as a previous sign, or if a sign is replaced in the same location or a different location on a building, a sign permit is required. If you have any questions specific to your home improvement project, please call the Building Department at (650) 616-7076.

**Q:** Can you give me a list of any special activities or events that the City has planned for the next few months?

**A:** The San Bruno Parks & Recreation Department offers a wide selection of special events this year. Mark your calendars for the following dates:

Saturday, October 16	Kid's Night Out
Saturday, November 20	Kid's Night Out
Saturday, November 27	13th Annual Holiday Boutique
Thursday, December 2	Holiday Tree Lighting Ceremony
Saturday, December 4	Santa's Workshop
Saturday, December 11	Breakfast with Santa
Thursday, December 16	Santa's Hotline

## Special events for seniors include:

Monday, October 11	Columbus Day Celebration
Saturday, October 16	BINGO Marathon
Tuesday, October 19	Oktoberfest Celebration
Tuesday, October 26	Yard Sale
Friday, October 29	Halloween Party
Friday, November 5	Motown & More Dance
Tuesday, November 16	Thanksgiving Celebration
Tuesday, December 14	Holiday Celebration
Friday, December 31	New Year's Eve Celebration

*For more information, please pick up a copy of the Fall/Winter Activity Guide available at the Parks & Recreation Department, the San Bruno Library, or San Bruno City Hall.*
